A Model of Network Change

- We'll approach the model in the following steps:
  1. The general form of the model
     - Network Functions
     - Behavior Functions
  2. The simulation & estimation engine
     - Assumptions of the model
       - Homogeneity – temporal/structural/behavioral
     - Goodness of Fit Statistics
  3. Empirical Examples
     - "Separating selection from influence"
